**ANNOUNCEMENT**

---

**UPDATE OF DRILLING OF THE JRR-6 DEVELOPMENT WELL AT THE  
JATIRARANGON BLOCK**

---

The Board of Directors of Ramba Energy Limited ("Ramba" or "the Company") refers to the previous announcements released on 23 October 2011 and 8 November 2011 regarding subsidiary Ramba Energy Jatirarangon ("REJ"), formerly known as Ellipse Energy Jatirarangon Wahana Limited ("EEJW") and drilling operations at the JRR-6 development well at the Jatirarangon TAC block, located in West Java, Indonesia.

The Company wishes to inform shareholders that drilling operations at the block's JRR-6 development well has yielded approximately 0.5 mmscfd of gas. The Company drilled to a total depth of 1,298 meters.

The JRR-6 and JRR-7 development wells were drilled in H2 2011 with the objective of doubling total gas production from the Jatirarangon block. On 27 October 2011, the Company announced that gas flow from the JRR-7 well reached 4.0 million standard cubic feet ("mmscfd"), the expected quantity for both the JRR-6 and JRR-7 wells combined.

REJ operates the Jatirarangon block with a 70 percent working interest whilst PT Wahana Sad Karya owns the remaining 30 percent working interest as a non-operator.

The Company will make such further announcements to inform shareholders of any updates regarding all business units in the Ramba and RichLand Group of Companies.

**Shareholders or potential Shareholders are asked to note this position and exercise due caution in respect of any investment, trading or dealing in the Company's shares (the "Shares") prior to any updates on this matter.**
